

Turnitin: Plagiarism Detection in Canvas

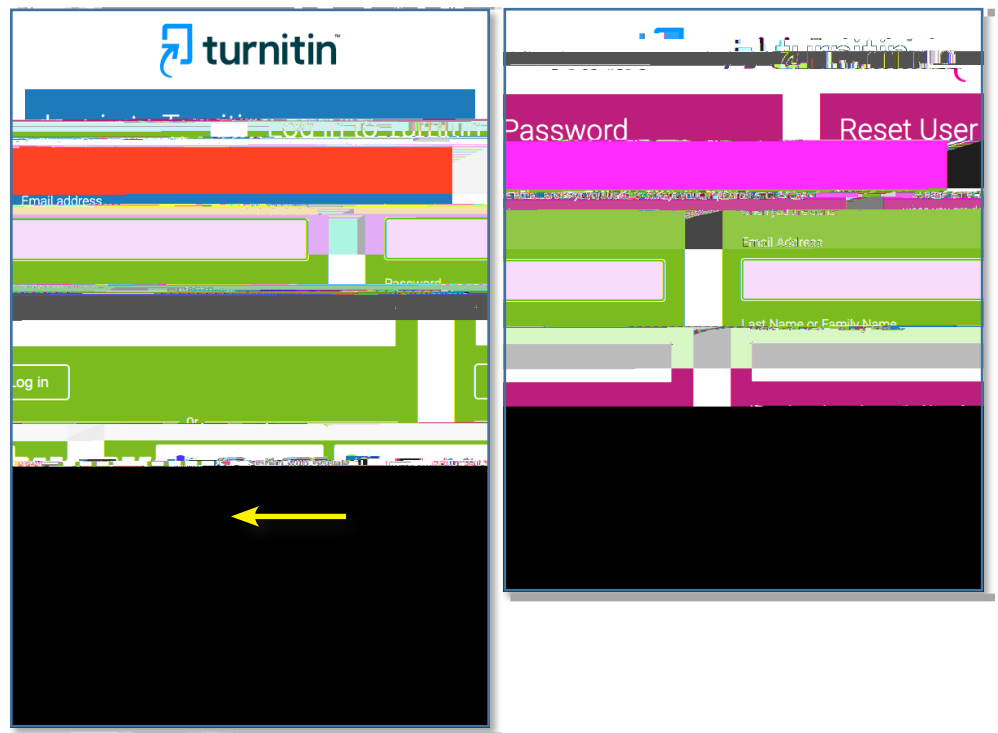

Turnitin is a Canvas-integrated plagiarism detection tool.

You can enable document upload on how to use the tool at the [Turnitin website](#), but here is a brief guide to getting started.

Establish a Turnitin account

The first time you integrate Turnitin in one of your Canvas courses, the system will establish your user account at [turnitin.com](#). If you do not sign in to [turnitin.com](#) prior to this, you will have to create your user account.

On the login screen, select **Forgot your password?** Then enter your email address and check your inbox for a password reset email.

Update your profile

Once you log in to [turnitin.com](#), **update your site profile**. To access your profile, select your name at the top of the screen. There are several settings here that have an impact on how the tool works and how feedback is provided. You will especially want to set your default user type, default submission type, and the default file type.

Remember: You might have multiple roles available in your Turnitin user account. Make sure to select the correct one for the work you are doing.

Submissions

Important: All work has been submitted directly through the Turnitin site (turnitin.com) and are NOT replicated back to Canvas. Even if an assignment or assessment has been

2. Change **Activate quick submit** to **Yes** and hit **Submit**

3. Once these settings have been saved, you'll see a new tab at the top of your page called **Quick Submit**, where you can upload multiple documents at once.
